

Live-in care
services

Do you require full-time care?

A care home is not your only option.

What is live-in care?

Live-in care can offer a great alternative to a care home. You'll receive the care that you need within your own home, in comfortable and familiar surroundings. Live-in care can support your daily life with personal care, getting out and about in the community, assisting with medication, meal preparation, domestic duties, running errands and so much more.

“ *I love my Carers. They really look after me and always remember what I like.*

The benefits of live-in care

- Stay in the home you love
- Keep your routines
- Continue with your favourite hobbies
- Carers often become treasured companions
- Your carer will help out as much or as little as you want so that you get to live on your own terms

Choose your own live-in carer with our help

My Care My Home offers a bespoke service and can help you choose the perfect live-in carer (or carers). We look for a personality match as well as considering your care needs. The cost of live-in care can be similar to the cost of staying in a care home and, in many instances, can be even more cost effective.

Finding the right live-in carer for you

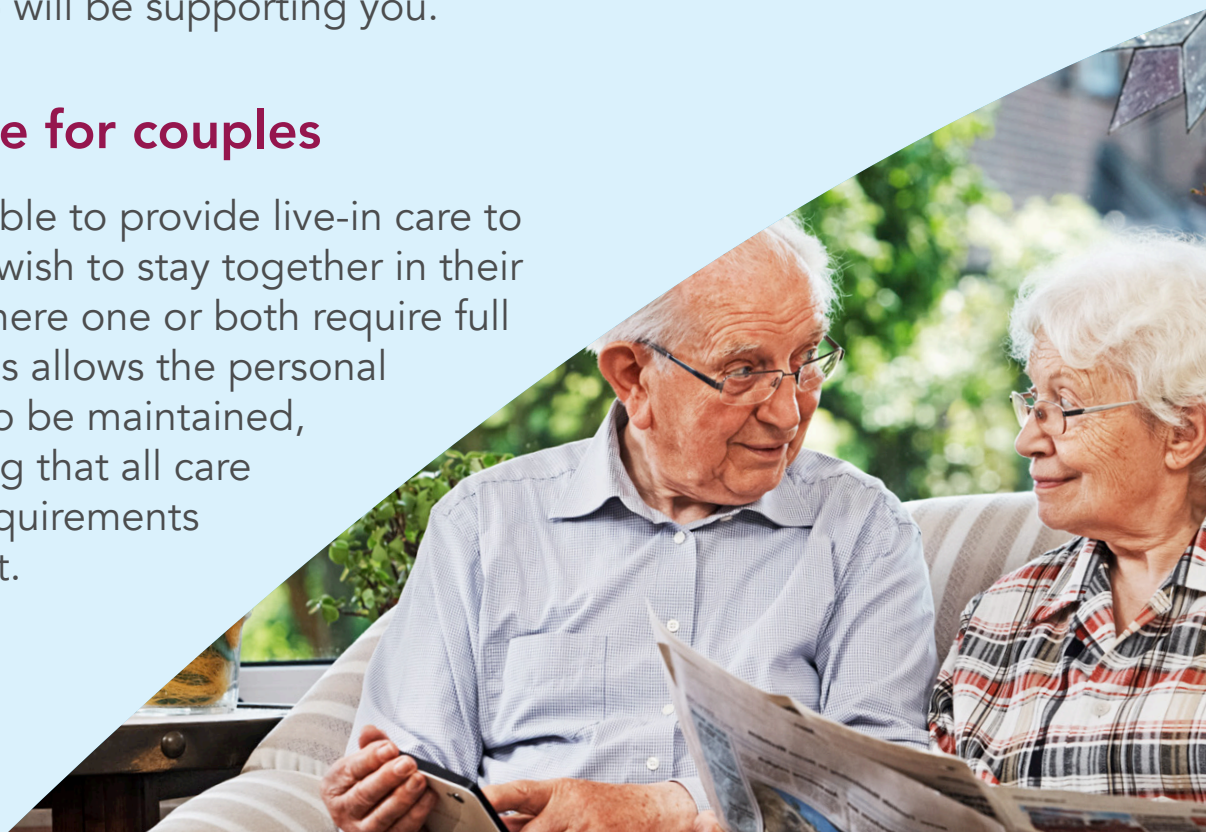

- We get to know you and what you're looking for in a carer. Everyone has different needs and requirements, so we start the search with you in mind
- We match you with one of our fully trained carers to find someone whose skillset and personality meet your requirements
- Alternatively, we can advertise to source potential carers on your behalf. We can help you carry out interviews and background checks

Your care plan

We'll work with you to create a care plan. This plan defines the services and support that your live-in carer will provide ensuring that your needs and requirements are clearly documented and set out for the carer who will be supporting you.

Live-in care for couples

We are also able to provide live-in care to couples who wish to stay together in their own home where one or both require full time care. This allows the personal relationship to be maintained, whilst ensuring that all care needs and requirements are being met.
